

## *Fjord Base - Visitor Information*

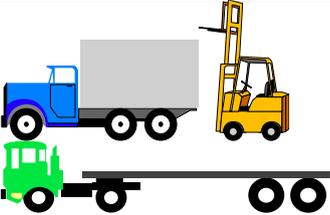

**Fjord Base's aim is to be the most effective and efficient supply base in the country. This involves a large focus on health, environment, safety and security. So that we can achieve this, we depend on everyone that has business at the base to follow our vision. To contribute to this is among other things to follow our regulations and rules which apply at the base, and not least to consider our activities which are here.**

We wish you a safe and pleasant stay here at Fjord Base

**At Fjord Base the following rules apply:**

 <p><b>ACCESS</b></p>	<p>The barrier at the entrance of Fjord Base is open on weekdays between 08.00 and 16.00. In the evenings, Saturdays and Sundays the barrier is closed. Companies and personnel which have business at the base will receive an access card. Enquire at Fjord Base AS.</p> <p>There is no access for unauthorised visitors to the base..</p>
	<p>At the Fjord Base there is a speed limit of 30 km/h. This limit is because of the outdoor activities and heavy traffic which is at the Fjord Base. It is therefore not up to any of us to evaluate our speed limit, but to keep this limit which has been decided.</p>
 <p><b>Use safety equipment</b></p>	<p>As protective equipment all visitors and people working at Fjord Base, shall as basic use:</p> <ul style="list-style-type: none"> <li>→ helmet</li> <li>→ safety shoes</li> <li>→ good visual clothing</li> </ul>
 <p><b>SAFETY EQUIPMENT</b></p>	<p>Other safety equipment which is necessary will vary from work operations and work place. For example, it is obligatory to wear safety shoes when loading and unloading. Work clothing such as overalls and gloves will also depend on the place and the work you carry out.</p> <p>Equipment such as hearing, eye and breathing apparatus must be consulted on together with the responsible person at the work place. Read and follow instructions on use of safety equipment in the data booklet.</p> <p>Today, it is necessary that all safety equipment will have a CE mark of approval.</p>
 <p><b>Order &amp; tidiness</b></p>	<p>A good contribution to safety at work is to have a good standard of order, tidiness and cleanliness.</p> <p>Everyone is encouraged to ensure good order and tidiness at their own work place.</p>
	<p>We request everyone to park at marked areas where it is permitted to park vehicles. On the quay and quay area must parking be reduced to the minimum, so that this is available for fork lifts, cranes, cargo trailers and other vehicles which are used for loading, unloading and transportation.</p>

	<p>At the Fjord Base there is heavy traffic with fork-lifts, trucks with large cargo trailers, trailers, cars and other pedestrians. It is important that vehicles which are used are in proper condition and in accordance with the laws and regulations which apply for that mode of transportation. Drivers of vehicles must have the appropriate certificates for that mode of transport. For example, everyone who drives the fork-lifts in these areas, roads and on the quays should have in addition to fork-lift driver certificate also have a certificate for class B, C or D.</p>
<p style="text-align: center;"><b>ROAD CLOSED</b></p>	<p>In special cases it is necessary to close the road to general traffic. In these special cases the area is closed with barriers and information. The reason for the closures is because the work in process can be dangerous to other traffic (for example, special transport, pipe loading/unloading, etc) So, for your own safety, respect the barrier and use another alternative road to and from your destination.</p>
	<p>Fjord Base has an aim to work with our activities without negative effects on our surroundings. Please give us your support on this aim.</p>
	<p>Rubbish should not be dumped in any of the containers at the base, without having an agreement with the company which uses the containers and that dumping can be undertaken. Individual companies on the base must provide handling of their own rubbish.  Therefore all users at the base are encouraged to approved handling of the rubbish. Observations of unlawful dumping of rubbish at the base must be reported to Fjord AS immediately</p>

**Other important information:**

	<p>Fjord Base is an industrial safety bound area which has established its own Industry Safety. This includes among others that personnel are organised in special groups which can undertake firefighting, first aid, order and security, technical services and restrict/hinder pollution to the external environment. Industry Safety has equipment and materials (hoses, hosepipes, oil booms, first-aid equipment, rescue basket, etc.) which are ready to be used in the event of an accident.</p>
	<p>The safety deputy is the first link in the safety services and is the workers representative in safety and environment questions. He/She will see that activities are arranged and maintained, and that the work will be undertaken in a way that considers the employees safety, health and welfare. All individual companies at the base have independent responsibility to establish safety services according to the authorities demands.</p>
